PROFILE

Data Engineering student at Universidad Politécnica de Yucatán with hands-on experience building ETL pipelines, cloud infrastructure (AWS + Terraform), and AI-powered APIs. AWS-certified, C1 English speaker, and Datathon 3rd-place award winner. Seeking a remote Data Engineering internship for Sep–Dec 2026.

EDUCATION

Universidad Politécnica de Yucatán <i>B.S. Data Engineering & AI · Mérida, México</i>	Expected 2027
Holberton School Mérida <i>DevOps Engineering Certification</i> <i>CI/CD · Containers · Infrastructure as Code · Cloud</i>	Expected Jul 2027

TECHNICAL SKILLS

Languages:	Python, SQL, PySpark, Bash
ETL & Pipeline:	Apache Airflow, Docker Compose, REST APIs, FastAPI, pandas
Data Warehousing:	Snowflake, PostgreSQL
Cloud & IaC:	AWS (EC2, S3, IAM), Terraform, Docker, Linux
AI & ML:	scikit-learn, Anthropic SDK
Visualization:	Power BI, Dashboard Design
Dev Tools:	Git, GitHub, GitHub Actions
Database Design:	Relational modeling, Normalization, Schema design

PROJECTS

ETL Pipeline — Airflow + Docker + PostgreSQL <i>Python · Apache Airflow · Docker · PostgreSQL · pandas · github.com/ElioUcan/airflow-etl</i> - Production-grade daily ingestion pipeline consuming the CoinGecko REST API; achieves under 1% failure rate via Airflow retry logic and task-level error handling. - Containerized with Docker Compose for zero-config deployment; demonstrates full pipeline architecture: ingestion, transformation, and PostgreSQL storage.	2025–2026
AI Agent — Anthropic API + FastAPI <i>Python · FastAPI · Docker · Anthropic SDK · PostgreSQL · github.com/ElioUcan/ai-agent</i> - Conversational agent with live tool use (CSV reader + PostgreSQL queries) and persistent memory, served as a production REST API via FastAPI. - Deployed to AWS EC2 with Docker Compose; covers end-to-end LLM production deployment: prompt engineering, cloud infrastructure, and API design.	2025–2026
DC Operations Dashboard — Data Center Case Study <i>Python · Streamlit · Plotly · Pandas · Docker · Terraform · AWS · github.com/ElioUcan/dc-dashboard</i> - Multi-page operational dashboard for a 100 MW data center monitoring uptime SLA (99.982%), PUE trends, and TIA-942/ISO 27001 compliance across 5 operational views. - Containerized with Docker and deployed on AWS with Terraform IaC; GitHub Actions CI/CD covers the full data visualization to cloud deployment lifecycle.	2026

Infrastructure as Code — Terraform on AWS

2025

Terraform · AWS (EC2, S3, IAM) · AWS CLI · github.com/ElioUcan/terraform-aws-infra

- Provisioned reproducible AWS environments (EC2 + S3) using modular Terraform with remote state; reduced provisioning time by approximately 90% (hours to under 10 minutes).

better-readmes — Claude Code Skill (Open Source)

2026

Anthropic SDK · Claude Code · npm/npx · github.com/ElioUcan/better-readmes

- Published open-source Claude Code skill that auto-generates READMEs and fills GitHub repository metadata; distributed via npm/npx.

UPY Datathon — 3rd Place

2025

Python · pandas · scikit-learn · Universidad Politécnica de Yucatán

- Applied data preprocessing, exploratory analysis, and predictive modeling to address the competition challenge, demonstrating a full analytical workflow from raw data to results.
- Ranked 3rd among all competing teams.

AWARDS

3rd Place — UPY Datathon · 50% scholarship awarded · 2025

Universidad Politécnica de Yucatán

CERTIFICATIONS

AWS Academy Data Engineer — Amazon Web Services · 2025

AWS Academy Cloud Foundations (20 hrs), Credly verified — Amazon Web Services · 2025

Data Analyst in Power BI (50 hrs) — DataCamp · 2026

Database Design — DataCamp · 2026

Introduction to Snowflake SQL — DataCamp · 2026

Deep Learning in Real Life, Honors — NextMid · 2025

LANGUAGES

Spanish (Native) · **English C1** — iTEP International (4.7/6.0)
