EDUCATION

Universidad Politécnica de Yucatán B.S. Data Engineering & AI A.S. Data Science	Mérida, México Expected Dec 2027 Expected Dec 2026
Holberton School Mérida DevOps Engineering Certification <i>CI/CD • Containers • Infrastructure as Code • Cloud</i>	Mérida, México Expected July 2027

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Bash
ETL & Pipeline: Apache Airflow, Docker Compose, REST APIs, FastAPI
Data Warehousing: Snowflake, PostgreSQL
Cloud & IaC: AWS (EC2, S3, IAM), Terraform, Docker, Linux
AI & ML: pandas, scikit-learn, Anthropic SDK
Visualization: Power BI, Dashboard Design
Dev Tools: Git, GitHub, GitHub Actions
Database Design: Relational modeling, normalization, schema design

PROJECT EXPERIENCE

DC Operations Dashboard — Data Center Case Study <i>Python • Streamlit • Plotly • pandas • Docker • Terraform • AWS</i> - Developed multi-page operational dashboard for a 100 MW data center monitoring uptime SLA (99.982%), PUE trends, and TIA-942/ISO 27001 compliance across 5 operational views. - Containerized with Docker and deployed on AWS with Terraform IaC; GitHub Actions CI/CD covers full data visualization to cloud deployment lifecycle.	2026
ETL Pipeline — Airflow + Docker + PostgreSQL <i>Python • Apache Airflow • Docker • PostgreSQL • pandas</i> - Production-grade daily ingestion pipeline consuming the CoinGecko REST API; achieves under 1% failure rate via Airflow retry logic and task-level error handling. - Containerized with Docker Compose for zero-config deployment; demonstrates full pipeline architecture: ingestion, transformation, and PostgreSQL storage.	2025–2026
AI Agent — Anthropic API + FastAPI <i>Python • FastAPI • Docker • Anthropic SDK • PostgreSQL</i> - Built conversational agent with live tool use (CSV reader + PostgreSQL queries) and persistent memory, served as a production REST API via FastAPI. - Deployed to AWS EC2 with Docker Compose; covers end-to-end LLM production deployment: prompt engineering, cloud infrastructure, and API design.	2025–2026
better-readmes — Open Source npm Package <i>Anthropic SDK • Claude Code • npm/npv</i> Published open-source Claude Code skill automating README generation and GitHub repository metadata population; distributed via npm/npv.	2026
Infrastructure as Code — Terraform on AWS <i>Terraform • AWS (EC2, S3, IAM) • AWS CLI</i> Provisioned reproducible AWS environments (EC2 + S3) using modular Terraform with remote state; reduced provisioning time by approximately 90% (hours to under 10 minutes).	2025

AWARDS & HONORS

3rd Place — UPY Datathon • Universidad Politécnica de Yucatán	2025
3rd Place — Holberton Programming Olympics • 50% scholarship awarded	2025
Holberton Anáhuac Mayab	

CERTIFICATIONS

AWS Academy Data Engineer — Amazon Web Services, 2025
AWS Academy Cloud Foundations — Amazon Web Services, 2025
Certified Associate Data Engineer — DataCamp, 2026
Data Analyst in Power BI — DataCamp, 2026
Database Design — DataCamp, 2026
Introduction to Snowflake SQL — DataCamp, 2026

LANGUAGES

Spanish (Native) • English C1 — iTEP International (4.7/6.0)
